resignation of himself and his cibinet to President Lebrum e Wednesday

They said the prenier refused to be led to the chamber (of dec utles) for sacrifice' on a vote of condeme, and that he would refuse to afriding to form a new cabinet.

Former Premier Pierre-Ettenne Flandth now is mentioned as a possible choice for the premier ship although the offer of the post to a Padicel Socialist is considered in some circles to be more their.

The break between Radical min isters and Laval was altributed fundamentally to disagreement over the premiers handling of Frances foreign policy in the Rain Lincolnin crisis.

In the event of Laval's over thow a complete Radical Socialist cabinet uppeared to be the mast likely prospect. It would be the first non-coalition minustry, since

Nerve Center.
An accidental short circuit in the Heil Clate station of the New York Lidizon Co one night last wook gave ruminative minds something to digest. One misninged cube literally paralyzed millions of human beings who knew no more about the intricacies of the electrical system whileh notices New York City than they know about the nerv ous system which serves their own builtes

Dependent on light, power and sound. New York City, or any other large urban community can be mude helpless by the failure of the invisible force which illum! nates tunnels and houses moves trains lifts elevators and transmits sound. Any cessation in the flow of electricity causes temporary panic so helpless are human beings in the intricate labylinths they have built for themselves. Suddenly deprived of sight movement and hearing they yield to panie temporarily at least In the same way that a pecuniary civiliza

tion has made them dependent on financial Institutions an electrical civilization has made them dependent on an uninterrupted flew of power to their lighting and tele phone systems their trains and radios It is a bribute to the engineering gonius of the men who have developed the manufacture and distribution of electricity that areidents rarely occur but nothing is flux less. When one thinks of the possibilities of confusion in a situation which exposed the nerve centers of cities to hostile hands he is tempted to turn backward to a routing of fiving which is adjusted to the slow un exciling tempo of daylight darkness walk ing and face to face com-creation

Senators Want To Know What Has Changed Roosevelt View on Deficits.

By DAVID LAWRENCE, Consists 1928, by The Verlos vias WASHINGTON Jan 20-Members of the Brance committee of the United Stat

the first or committee of the United Stat we senate it that become known have asked the secretary of the interrupt some per timent questions relating to the future credit of the government.

Although the secretary wanted his samewers kept secret some of the committee refused to byte to secret) declaring that the peoples business must be conducted in the open. It develops that Precident Robers's a fugit measure painted a far more out

Fudget message painted a far more opt mustic picture of government finances than was warranted at the time he made Jan 6 Mr Morgenthau insists that Jan 0 Mr morganization instance that were the message was sent to congress that there were certain items of expense to the anticipated. He referred of sours to the supreme court decision invalidation the rocessing taxes.
But it turns out also that Mr. Morgenit i.i.

processing taxus. But it turns out also that Mr. Morgraft at uses the figure of \$2,000,000.000 i.e. extinute the probable relief expenditures and President Roosevelt did not give any estimate at all declaring he avoid do so later if Secretary Morgrathaus extinute if \$2,000,000.000 for relief is added to the \$1,000,000.000 deficit for the fuest year helping next July the deficit pose over the \$3,000,000.000 mark without any alloward for farm subsidy amounting posibly to an other \$2,000,000.000. The partificity of a deficit of \$3,000,000.000 without any bonis expense added is what makes the budge missage of Jun 8 now subject to criticism lastend therefore of a fourth Prosecvit budget that is less than the third it looks if the fourth budget will exect the third. This upward curve in deficits in what Mr. Morgrathau frankly udmits is apt to be desturbing to hopers in the bond market and increase the cost of birrowing in abswer to questions from anishers.

In answer le questions from a maters Mi Morgenth it conceded that if the garanent couldn't stell its bonds he uses of any lock of confidence in gavernment credit there would be financial choos. No such continuency with axis, however it the government finances are placed on a sound basis and it is to this end that members of the senate and beginning now to instat that the public be given if in instantinate of the meaning of the budgets that are being presented in picernical fashion.

rashion Balley Democrat of North Unclinitions particularly analous to know from Secretary Morganians during the hearths just shal halphened disc M. Roose yell delivered his missage to congress on March 10 1933 that changed the picture with respect to the effect on gustament credit of confined deficial Here is the excerpt from the message of March 10 1933 sent to Picelifert Roosevelt to both houses of congress.

congress
For three long years the federal government has been on the road toward hank upter For the flacal year 1931, the deficit was \$10,000,000

\$10° 000 000 For the fiscal year 1932 it was \$2.172 000 000

For the fiscal year 1932 it will probable 200 000

Tot the fiscal year 1933 it will probable exceed \$1.00 000 000

For the fiscal year 1931 based on the appropriation bills passed by the last congress and the estimated accounts the dofficit will probable exceed \$1.000 000 000 unless jumediate action is taken.

Thus we shall have piled up an accumulate action is taken.

Thus we shall have piled up an accumulate action of \$5.000 000 000.

With the utmost seriousness. I point out to congress the profound effect of this fact upon our national economy. It has acquiributed to the second collapse of our banking structure. It has accentuated the singuistion of the economic life of our people. It has added to the ranks of the unemployed. Our government's house is not in order and for many reasons no effectly action has been taken to restore. It to order.

effective action has been taken to restore to order. Upon the unimpaired credit of the Indical States government rest the safety of deposits the security of Insutrance policies the activity of Industrial enterprises the value of our gricultural products and the availability of employment. The credit of the United States, government definitely affects these fund threath human values it therefore becomes our first concern to It therefore becomes our first concern to make seems the foundation. National 18

covery depends upon it Fas often in recent hittory librial gas eruments have been were led on rocks of loose fiscal policy. We must avoid this

It is too late for a lisurely approach to this problem We must not want to act second months hence the intergency is accentuated by the necessity of meeting wreat refunding of crations this er ring

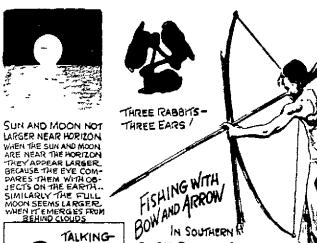

We must move with a direct and reso-lute purpose now. The members of the congress and I are plaged to immediate congress and I are placed to immediate economy. I am therefore is unting that you and I are in complete agreement as to the urgent necessity and my constitution all duty is to advise you as to the methods for obtaining diagnic retrienchment at this lime I am not speaking to you in general lerns I am joinling out a definite road

What wen Balley wanted to know wes wherein conditions had changed slace ther because Mr. Roomeelt's budget me age of this manth pointed out dirities of \$3,000,000 in 1931 and \$3,75,000,000 in 1935 and \$3,23,000,000 in 1935 and now the eximated fourth west deficit appears to be going higher. The secretary of the treasury

mated fearth year defield appears to be going higher The secretary of the treasury according to the published transcript of his remarks did not answer the query. He contented himself with suggesting that the receipts would license as business recovered and he expressed the hope that congress would he expressed the hope that congress would not expressed the hope that congress would not expressed the hope that congress would not expressed the hope that congress would be kept undeed the inference that can be disawn is that some new tax pin will have to be detired unless exploses statement to congress on March 10 100 which in effect conformed the first of join of his predicessor i readout Hoover is now contracted with a record of leftents much work that the first that he got exploses that a sum of his predicessor i readout Hoover is now contracted with a record of leftents much work that the first that he got explose that a sum of a shall include the work that the got errinent will be a borrower to be explicitly that he got errined will be a borrower to be explicitly as a reason for leftenty in I o be purposes a as mentioned by Secretary Marges had as a reason for keeping it mind the importance of cuttons additional drains on the reality through new legislation.

The treasure situation is remediable and gove timent eacht is all store. But whe her it will commend I for the pilet apon deficils is what sens our are wonder
